

U-VUE Biomarkers

The U-VUE Biomarker menu consists of pre-optimized markers, ready to be built into multiplex panels. Assess cell phenotypes and marker expression, find tumor and stromal regions, and understand spatial relationships across the whole slide. Select the markers you need from the list, up to 8-plex, and create a custom solution to fit your specific analysis needs.

Not sure how to get the most out of your tissues? Our in-house team of experts can assist across the entire spectrum of your development and partner with you to find the custom solution to answer your biological question.

Develop customized biomarker panels to get the spatial insights that matter to you.
